

iNPLAN[®]

The Software for optimizing
the production workflow
of **iNOFFICE** aligners

Scale your aligners production

ORTHOIN3D
Future of Orthodontics

iNPLAN[®]

platform is the key for orthodontists who want to create their own brand and regain independence by producing aligners in-office. iNPLAN enables optimization of aligners production and gives each of the practice stakeholders a real-time vision of the workflow.

Regain Independence

Choose the treatment planning software you prefer

Use iNPLAN alongside your setup software to manage your production workflow.

Establish your own production flow

With iNPLAN, your team can easily plan and organize the production of your aligners, according to your practice's orders.

iNPLAN ensures tracking of 3D printing and thermoforming, reducing the risk of errors in your production workflow.

Orchestrate Your Production

At the pace of the treatment plan

iNPLAN gives you a complete overview of individual patients' treatment timeline and guides production of the correct number of aligners for the next appointment.

Empower your teams

From 3D printing to labelling, teams have a real-time view of the complete workflow, allowing them to organize their activity and easily handle any schedule changes.

Ensure Traceability

iNPLAN automates the printing of labels for each aligner. You save time at every step and ensure traceability.

Create your Brand

You can communicate with your own brand on the packaging. ORTHOIN3D supports you to become in-office aligner producer.

▷ iNLASE Interface (available only with iNLASE trimming machine)

- Semi-automatic Trimline
- Import Trimline from major Setup Softwares (.pts files)
- Automatic creation of iNLASE positioning base from STL files
- Control iNLASE
- Secured cloud to save STL 3D models

▷ Specifications and Pricing

Versions without iNLASE The cost is adapted to your production
